Installing the Panopto Recorder

Step 1 – Download the Panopto Recorder

After the **Panopto link** is added to your course menu, the next step is to install the **Panopto Recorder** in order to be able to record videos.

Note: Employees are not given administrative privileges on college computers. Administrative rights are needed to install software products therefore this procedure must be performed by **IT Services**. Send an email to its@sl.on.ca and request their assistance.

1. Click **Panopto** in your Blackboard course menu to access this page

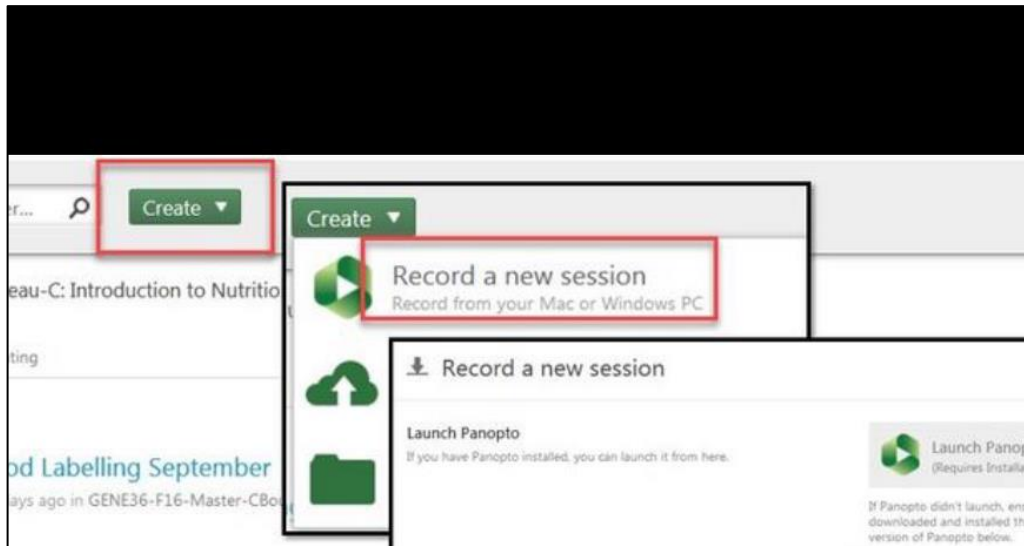

2. Click **Create**
3. Select **Record a new session**
4. Select **Download Installer**

Tip: Make sure to select the option that matches your

- Computer Type (MAC vs PC)
- Operating System & Version Level

- ScrPC Bit Depth of Processor & Operating System (32 bit vs 64 bit)

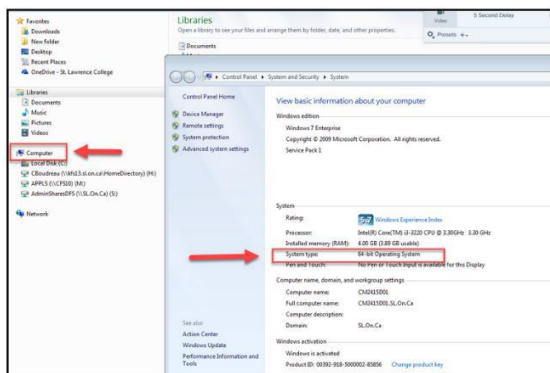

5. An Installation file will be downloaded to your computer.

Step 2 – Install & Configure the Panopto Recorder

1. **Right Click** on the installation file and select **Run**
2. The install wizard will open. Click **Install**
3. For PC users, select 32 or 64 bit

Tip: If you not sure if your systems is 32 or 64 bit,

1. **Right Click** on **Computer**
2. Select **Properties**
3. Look under heading **System type** for bit level
